

2026 Cybersecurity Training

Prepare your organization to face the threats
shaping 2026 — and beyond.

Why This Training Matters

Cyber threats are evolving faster than ever, and employee mistakes remain the #1 cause of breaches. Our 2026 Cybersecurity Training gives your organization the foundational knowledge to recognize threats, avoid costly errors, and build long-term security habits.

This year's training features a professionally produced, live-action format with realistic scenarios that make key security concepts memorable and easy to apply.

Key Benefits

Engaging Experience

- Professionally produced, live-action training designed to make key lessons stick
- Cinematic, story-driven scenarios modeled after real threats employees face

Practical & Actionable

- Builds the foundation employees need for ongoing, year-round security training
- Downloadable supplemental training guide
- Completion certificate with optional LinkedIn sharing

Easy to Roll Out

- Accessible anywhere — desktop or mobile
- Simple deployment with monitoring and reporting

Time Commitment

Approx. **30-40** minutes

Efficient, accessible training built for busy teams in any setting — in the office, remote, or on the go.

What Your Team Will Learn

Practical, memorable lessons aligned to today's most common and costly threats:

-  Social engineering and phishing
-  Business email compromise
-  Password and authentication best practices
-  Ransomware risks
-  Safe browsing and device habits
-  Data handling and privacy basics
-  Real-world incident response guidance
-  How to spot — and stop — modern cyberattacks

Who This Training Is For

Everyone.
From frontline staff to leadership, the training is designed for all roles, all technical skill levels, and any work environment.

Why Organizations Trust This Training

By partnering with Breach Secure Now — the industry-leading provider of cybersecurity, productivity, and AI training with 1M+ employees trained — we deliver education grounded in real-world experience and updated annually to reflect the latest threats.

*Stronger security starts with
training built for today's threats.*
